## Investor Profile

- Wants total return through capital and dividend growth
- Accepts the risk associated with the volatile nature of equity investments
- Plans to hold their investment for at least five years
- Favours a portfolio with defensive characteristics
- Prefers no investment in tobacco or cluster bomb manufacturers

## Fund Objective

The aim of the Fund is to provide capital appreciation over the long term (five years or more) by investing in dividend growth companies. To deliver this, the Fund invests in a portfolio of between 60 and 100 listed global equities. The companies selected have high levels of profitability and cash generation, consistent re-investment, low levels of debt and prudent governance. To the extent that the Fund is not fully invested in listed equities, investments may be made in cash-like instruments but these are not intended to be more than 10% in aggregate of the Fund's value.

## Portfolio Comment

There were no new investments or full sales made in December. The top five contributors were **Accenture, Lindt & Sprungli, Activision Blizzard, Baxter International** and **Sage**. The five biggest detractors were **Misumi, Analog Devices, eBay, Kose** and **bioMerieux**.

**Zoetis**, a leader in medical therapies for companion animals and livestock, continues to achieve a significant operating leverage and as a result increased the dividend 30%. Zoetis has been a beneficiary of the pandemic due to a rise in companion animals as households were forced to shelter due to lockdown measures. New Fund holding, **Nordson**, also grew its dividend by 31% in December. The industrial technology company designs and manufactures equipment for precision dispensing, fluid control & related processes involving proprietary technology. The economic recovery from the pandemic has seen a rise in demand for equipment installations. **Abbott Laboratories** announced a relatively modest 4.4% growth in dividend, the 49<sup>th</sup> consecutive year of growth. The healthcare conglomerate focuses on cardiovascular implants, clinical diagnostics, diabetes monitoring, nutrition and generic pharmaceuticals. Its clinical diagnostics franchises were extremely important in fighting the pandemic as they launched 13 different detection kits. World leading medical services company **Stryker** also announced a 10.3% increase in the dividend as well as a large acquisition focused on connected medical devices. Stryker specialises in orthopaedic implants, surgical equipment and neurotechnology and the business continues to be driven by innovation and rising demand due to demographic trends.
