Investor Profile

- Wants total return through capital and dividend growth
- Accepts the risk associated with the volatile nature of equity investments
- Plans to hold their investment for at least five years
- Favours a portfolio with defensive characteristics
- Prefers no investment in tobacco or cluster bomb manufacturers

Fund Objective

The aim of the Fund is to provide capital appreciation over the long term (five years or more) by investing in dividend growth companies. To deliver this, the Fund invests in a portfolio of between 60 and 100 listed global equities. The companies selected have high levels of profitability and cash generation, consistent re-investment, low levels of debt and prudent governance. To the extent that the Fund is not fully invested in listed equities, investments may be made in cash-like instruments but these are not intended to be more than 10% in aggregate of the Fund's value.

Portfolio Comment

Three sales were made in May, the US stocks **IFF** and **IPG Photonics**, and the Japanese beauty company **Kosé**. One purchase was made, the Swedish industrial stock **Atlas Copco**. The top five contributors were **Littelfuse, Analog Devices, WW Berkley, Baxter International** and **Apple**. The five biggest detractors were **Ross Stores, Costco Wholesale, Lindt & Sprungli, Misumi Group** and **Sage**.

There were six dividend announcements in the month of May with an average growth rate of 10.7%. Notable changes were **Sonova** and **Misumi**. Sonova is a leader in addressing hearing loss through hearing aids and implants, distributed through their own network of fitting stores. The company announced a 36% increase in the full year dividend driven by continued recovery in demand from the pandemic as well as recent technology investments supporting new higher priced product launches. Misumi is focused on digitising the manufacturing and purchase of factory automation equipment and maintenance, repair and operations consumables. Continued investments through the pandemic, as well as cost rationalisations have led to a sharp recovery in revenue and profits. Management announced a 120% increase in the dividend in 2021 from 2020 and have also indicated an intention to grow the 2022 dividend in-line with earnings of around 12%.
